Document Title : Safety Department						

report information to Patient Safety Organizations (PSO's), on a privileged and confidential basis, for the aggregation and analysis of patient ...

SOP (5) Why is safety needed?

A safe and healthy workplace not only protects workers from injury and illness, it can also lower injury/illness costs, reduce absenteeism and turnover, increase productivity and quality, and raise employee morale. In other words, safety is good for business. Plus, protecting workers is the right thing to do.

SOP (6) What are some safety issues?

Common types of safety hazards in the workplace are:

- Slips, trips and falls. ...
- Bad housekeeping and poor drainage can make floors and other walking surfaces wet. ...
- Fire and Explosions. ...
- Transportation and Vehicle-Related Accidents. ...
- Confined Spaces.

SOP (7) What are two of the top 10 safety concerns for Hospitals?

Rounding out the list of patient safety concerns for 2021 are the following:

- Diagnostic errors. ...
- Panchkarma vyapat
- Early recognition of behavioral health needs. ...
- Responding to and learning from device problems. ...
- Device cleaning, disinfection and sterilization. ...
- Standardizing safety across the healthcare system.

SOP (8) Why is safety important in Hospitals?

It aims to prevent and reduce risks, errors and harm that occur to patients during provision of health care. A cornerstone of the discipline is continuous improvement based on learning from errors and adverse events. Patient safety is fundamental to delivering quality essential health services.
