- Pathyadi Vichara.

Method of preparation of Vaitaran Vasti

Initially 24 gm. of Guda was mixed uniformly with equal quantity of lukewarm water. 12 gm. of Saindhava was added to above. Tila taila (60ml) was added till the mixture become homogenous. 48 gm. of tamarind (Chincha) Kalka was taken and added to above mixture carefully. Lastly Approximately 200ml of Gomutra was added slowly and mixing continued so as to have uniform Basti Dravya. Finally after filtering, Basti Dravya was made lukewarm by keeping it into hot water.

Time of Administration :-

If the patient is strong, can be given empty stomach.

If patient feels dourbalya, it can be given after food also.
